

CLEANSEAL EXTRACT EXHAUST/RETURN AIR HOUSING

ADVANTAGES

- High corrosion protection against decontamination agents
- Ensure localized control of potent compounds, eliminating the contamination of downstream ductworks
- Easily operation with scanning system for filter integrity test
- Tool-less filter clamping 100% secured and immediate
- Quick grid locking for immediate access to filter
- Long lasting reliability and tightness : robust fully welded construction

Application	CleanSeal Extract is wall mount equipment used for exhaust/return air system: Pharmaceutical, Biotechnology, Chemistry, Hospitals, and animal facilities.
Comment	Type: Fully welded Wall mount housing. Construction: Carbon steel, fully welded seams, accessories in Stainless Steel Finish: 3 Steps - white epoxy coated RAL 9010, qualified for high corrosion protection against decontamination agents Filter Seal: Endless PU gasket on filter. Connection: Rectangular pre-drilled flanges. Pressure Gauge: Pressure gauge is pre-installed on the equipment. Performance: The whole equipment could bear $\pm 1000\text{Pa}$. The overall leakage rate should no more than 0.25% per hour under 1000Pa pressure. Scanning system: According to standard ISO14644-3.
